# Report of the Superintendent of Schools

---

*To the Citizens of Weare:*

## TEACHERS:

This year has seen but two changes in the teaching force, and neither of the two teachers is "new." Miss Frances Downing now at "Friends" taught part of last year at Sugar Hill and Miss Dorothy Smith, now at Sugar Hill, taught for a term last year in the Junior and Senior High Schools.

## ACTUAL SCHOOL DAYS:

By this is meant the number of days when schools were actually in session.

Last year the school year for Weare High School covered 185 days. After deducting 11 days lost for institutes, bad weather, holidays and other causes, school was in session 174 days. The average for the high schools of the state was 179 days of actual school. This means that the Weare pupils were offered a whole week less than the average for the state.

The elementary schools in Weare last year averaged  $173\frac{1}{2}$  days in actual session. The state average was 177. Again this is  $3\frac{1}{2}$  days less than the average elementary school year in the state.

To remedy this for the current year the teachers' contracts call for 180 actual school days. In this way almost an additional week's schooling is provided for pupils without any additional cost to the town.

## ATTENDANCE:

Attendance in high school reached 94.4% — just a little below the state average of 95.

Elementary attendance was 92.9%. State average for elementary schools was 95.3.

The registers for last year indicate that the total days' absence for elementary schools was 2,274 days. That equals a year's schooling for each of 13 pupils.

That is a real loss. Absence means not only time lost, but loss of work, lessened interest, holding back of individual and sometimes others. Without question, there are many days when absences are unavoidable because of sickness, or weather, or some other real reason. But this loss of 2200 days has in it, quite likely, a large number of unnecessary times out. Even though a school has the best teacher in the state, and all the books that can possibly be used, these do not help the pupil. It's the days "present" that count profitably. Every parent of school children can have part in preventing this loss.

These 2200 days were all paid for, building heated, cared for, and *lost*.

## TARDINESS:

There were 215 elementary pupils (grades 1 to 8) last year. The total number of "tardy marks" is 420. This means almost 2 times tardy for each pupil. The state average is less than 1 per pupil. We are pupils have twice as many tardinesses as the average pupil in the state. Tardiness does not seem to be regarded as a very serious matter. Perhaps it isn't. But it is one of the small items that enters into the personal record as well as that of the school.

Of these 215 elementary pupils only 24 were neither absent nor tardy. That is, almost nine out of every ten were either absent or tardy.

To sum up the items in which the schools of Weare should more nearly approach the average of the state.

- (1) Length of school year.
- (2) Percentage of attendance — both for high and elementary pupils.
- (3) Number of absences per pupil.
- (4) Number of tardinesses per pupil.

Item (1) is on the way to better record this year, by having a school calendar calling for 180 actual school days after all *no-school* days are taken out.

However, items 2, 3 and 4 all have to do with attendance. Neither the teacher, nor Board members, nor the Superintendent can improve these. The remedy here lies in the homes and with the parents of the children who come. Comfortable school rooms are provided, capable teachers are doing their part, books and equipment are furnished free. Yet these are of no help to the absent pupil.

The "Absent Treatment" works, but it works to the disadvantage of the absent. The children are the ones who are robbed. A lost school day never comes back to give a second chance. The home can help in this matter and can give the impetus necessary to reduce by several hundreds of days absence and tardinesses.

#### HEALTH SUPERVISION:

Miss Edith Walker, R.N., has charge of Health Supervision. In addition to Weare, she has the same work in the schools of Dunbarton, New Boston, Goffstown, Goffstown Special and Bedford School Districts. The work is in part

examination of children—trying to have defects remedied—prevention — instruction and home visitation in many instances, also helping out here in distribution of food and clothing.

There is no school physician in Weare. As a precautionary measure in the High School, pupils, both boys and girls who play basketball should be given a thorough physical examination for the detection of hearts which should not be subject to the strain of violent games and other possible physical weaknesses. Such examination is a safeguard — the welfare of the pupils. It would be a tremendous advantage if a school physician were available to examine all pupils in all the schools.

To the members of the School Board and to the teachers, I desire to express every appreciation of their always willing co-operation.

J. BYRON TARNEY,  
*Superintendent of Schools*
